

PAINTER FOR A DAY PROGRAM

How It Works

One or more of our painters will show up on the scheduled day or days to help you get a boost on your project. A daily rate of \$350.00 per painter will be provided to the customer. A day constitutes up to 8 hours of work per painter in a single day within normal working hours (8am to 5pm). We ask for a 30 minute break for lunch and to take a couple of short breaks before and after lunch. If working outside in inclement weather, our painters must be able to follow the specs of the product being applied which usually means not working in rain, or in sustained temperatures above 90F and below 40F. We work diligently during the set amount of time and can work alongside you, the customer, or independently.

Exclusions

The Painter for a Day Program does not guarantee the completion of the project within the purchased time. We will paint and/or prep as much as we can within the given time but in order to complete the project either more days must be purchased and approved by the customer or you may choose to finish the project yourselves. Additional daily hours beyond 8 hours will be billed at the hourly rate of \$45.00/hour per painter. This program also doesn't guarantee that you'll become a master painter during the course of the project, although, you may learn how the pros do it. Lastly, the program does not protect the customer or your employees/guests personally within the umbrella of our workers compensation or our general liability insurance. Only our employees and/or incidents resulting from the work of North Atlantic Painting Company employees are covered.

Paint and Materials

Paint and other sundry items are not included in the daily rate for this program. However, these items may be purchased through North Atlantic Painting Company and billed separately from the daily labor rate specified above. Otherwise, the customer is responsible for providing the paint and sundry items. Sundry items are defined as tape, roller covers, tray liners, caulk etc.
